Projects

created a Bus reservation system project | *Java,HTML,visual studio, JavaScript*

Feb 2024

- Developed Bus reservation system using Java and MySQL, focusing on MVC architecture and API integration.
- Implemented frontend with HTML, CSS, and JavaScript, ensuring responsive design and user-friendly interface.
- Applied Agile methodology for iterative development, emphasizing teamwork and adaptability in project execution.

Integrative Healthcare Management System with EMR Integration | *Associated with VIT*

Dec 2022

- EMR Integration: Implemented seamless integration of Electronic Medical Records (EMR) to centralize patient information, enhancing accessibility and data accuracy for healthcare providers.
- Security and Compliance: Ensured compliance with healthcare regulations (such as HIPAA in the United States) by implementing stringent data security measures, safeguarding patient privacy and confidentiality.
